

Wireless Home Networking - Worry-free installation for your wireless network

Get service at your home, save time and frustration, and start enjoying your technology. We will help set up your encryption security, get the best connections possible, transfer data, and install software. Choose the package that is right for you.

Pricing

Wireless Home Networking [BASIC] \$109.00

Wireless network setup by our expert technicians to connect up to 2 computers or devices, and arrange printer and file sharing, and security encryption up to help prevent intruders.

- Set up gateway or wireless router
- Configure your Internet Service Provider (requires active ISP account in advance of our visit)
- Connect up to 2 computers or IP compatible devices (includes desktops, notebooks, netbooks, wireless-capable game consoles, wireless-capable Internet enabled TV's or Blu-Ray players, or wireless printers)
- Configure file sharing and printer sharing with one local printer connected to one of the networked computer
- Set secure encryption for your wireless connections

Wireless Home Networking [DELUXE] \$149.00

Wireless network setup by our technician with up to four computers or devices, file and printer sharing, and provide a security audit and encryption set up to help prevent intruders.

- Set up gateway or wireless router
- Configure Internet Service Provider (requires active ISP account in advance of our visit)
- Connect up to four computers or compatible IP devices (includes desktops, notebooks, netbooks, wireless-capable game consoles, wireless-capable Internet enabled TV's or Blu-Ray players, or wireless printers)
- Configure file sharing and printer sharing with one local printer connected to one of the networked computers
- Install one or two compatible standard software applications (does not include operating systems)
- Set secure encryption for your wireless connections
- Provide security audit recommendations for increased privacy

Wireless Home Networking [ULTIMATE] \$189.00

This service includes setup of a NEW computer along with wireless setup for up to six computers or devices, setup file and printer sharing, and provide a security audit and encryption to prevent intruders.

- Setup gateway or wireless router to an active Internet Service account
- Unbox and assist with registering one new computer [desktop or notebook or netbook] and prepare it to be part of your new network (this is part of our BASIC In-Home Computer Set Up Service – a \$119 value included with this purchase)
- Connect a total of up to 6 wireless IP devices or compatible devices (including desktops, notebooks, netbooks, wireless-capable game consoles, wireless-capable Internet enabled TV's or Blu-Ray players, or wireless printers)
- Configure file sharing and printer sharing with one local printer connected to one of the networked PCs
- Install 1 or 2 compatible, licensed software applications (not operating systems)
- Provide security recommendations for increased wireless privacy
- Set secure encryption for your wireless connections
